

To Update Machine Group Policy and Software Center

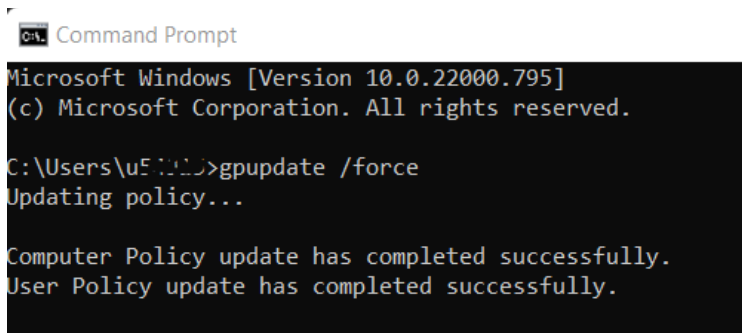

Important: If you are in any of our UST Global premises and connected to UST network, please skip step 1.

1. Open Zscaler Client Connector and Authenticate Zscaler Private Access. Stay connected for 1 hour.

(Please disconnect if there is any other VPN connected)

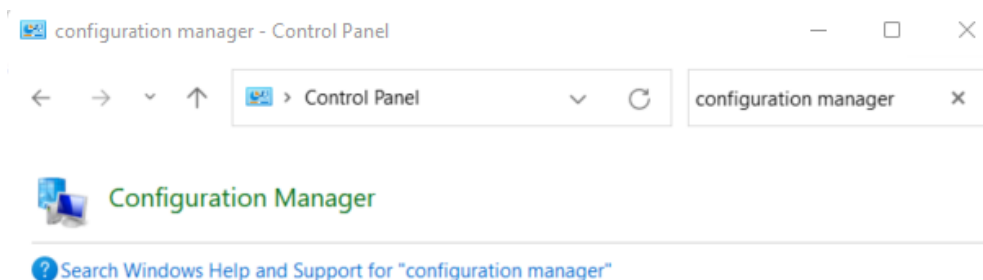

2. Open Command Prompt and run **gpupdate /force**

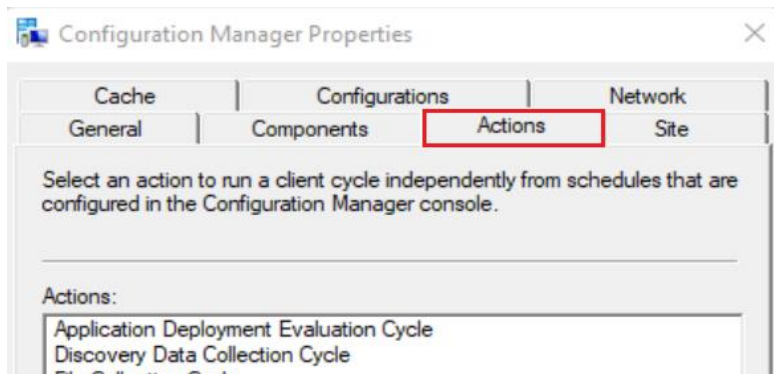

Wait until both Computer policy and User policy gets updated successfully.

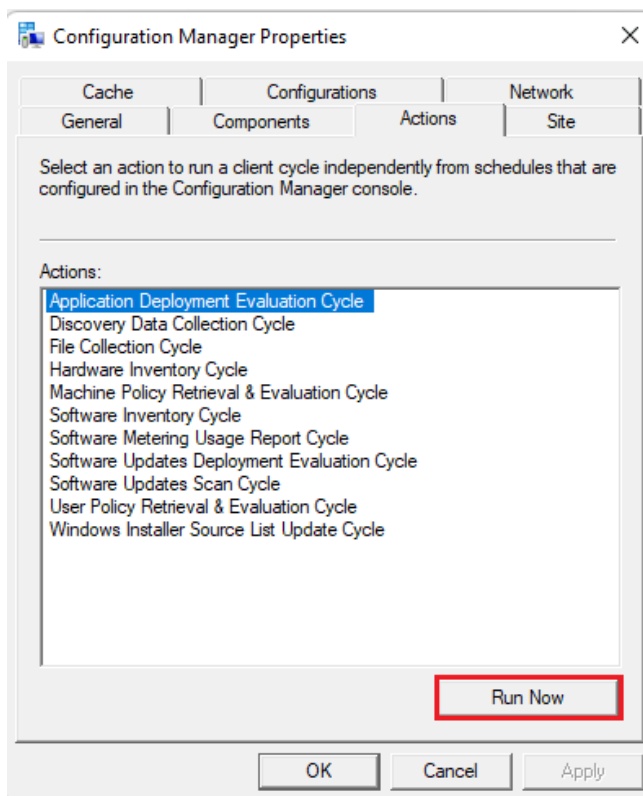

3. Open **Control Panel** from Start menu.
4. Search for **Configuration Manager** and open it.

- Once the Configuration Manager Properties is open, click on the **Actions** tab.

- Select and run each cycle individually.

- After running every cycle, re-open the Software Center and try to Install the required softwares.

If you face any difficulties in above steps, please contact **L1RemoteSupport** <L1RemoteSupport@ust.com>
